Safety-Mindset Intelligence System

Safety Sign Library & Assessment System — User Operation Manual

User Manual v2.4

System Overview & Introduction:
Welcome to the Safety-Mindset Intelligence System. Designed to enhance industrial safety awareness, this system provides employees with quick lookup tools for occupational safety signs, self-assessment quizzes, and official evaluation testing.

1. Safety Sign Browsing & Inquiry

STEP 1	STEP 2	STEP 3	STEP 4
Open Homepage	**Select Category**	**View Sign Details**	**Submit Revision**

2. Search & Category Switching

Users can quickly locate target safety signs and protective measures using the navigation toolbar:

- **Category Filtering:** Click tabs like "All", "Prohibition", "Warning", "Mandatory", or "Emergency" to instantly switch categories.
- **Real-time Keyword Search:** Enter sign names (e.g., "Wear Helmet") or sign codes (e.g., "P001") to dynamically filter the displayed list.
- **Detailed Information Window:** Click any sign card to view high-resolution imagery, full titles, codes, and detailed safety regulations.

Feature	Location	Description
Category Search	Top Navigation Tabs	Filter signs by category to facilitate targeted safety learning.
Keyword Search	Search Bar	Supports fuzzy search by code or title with instant results.
Edit Request	Modal Bottom	Double-click text fields to propose modifications for review.
Practice Quiz	Main Menu Button	Randomly generates 5 questions for self-assessment.

3. Quiz & Official Assessment Workflow

The platform offers two evaluation modes: "Practice Quiz (Self-Study)" and "Official Assessment".

Modes & Guidelines

- **Practice Quiz:** Available anytime; randomly draws 5 questions. Displays scores and answers immediately without recording to employee files.
- **Official Assessment:** Requires Employee ID and full name. Exam scores are automatically uploaded to the plant HSE database.
- **Question Mechanism:** Questions display sign graphics with 4 multiple-choice options, backed by an anti-repetition mechanism.

1. Start Quiz & Authentication

Click "Practice Quiz" or "Official Assessment". For official exams, enter your valid Employee ID and full name in the dialog box to begin.

2. Answer & Submission

Examine the safety sign for each question and select the correct option. Submit your test at the final question to generate an instant score report.

> 💡 **Pro-tip for High Scores**
> Prior to official testing, review sign graphics in the "Sign Library" or complete 2-3 "Practice Quizzes" to familiarize yourself with safety definitions and maximize pass rates.

4. Admin Login & Authorization

Plant safety managers can access the management console to review pending data changes and maintain master database records.

🔐 **Admin Login**

Click "Admin Login" in the top right header, enter your dedicated administrator password, and unlock management functions.

🔒 **Secure Logout**

Always click "Logout Admin" upon completing task sessions to prevent unauthorized modifications by subsequent users.

5. Data Change Approval (Pending Approval)

When employees submit revisions, requests are held in the "Pending Approval" queue awaiting manager authorization.

📋 **Review Workflow Steps:**

1. Log in as Administrator and select "Pending Approval" from the main menu.
2. Review the sign code, modified fields, and requested content submitted by staff.
3. Compare original values with proposed edits, then click "Approve" or "Reject".
4. "Approve" synchronizes updates to the master database; "Reject" discards the request.

Action	System Execution	Notes
Approve	Immediately updates database and notifies personnel.	Ensure edits comply with current HSE standards.
Reject	Discards application, retaining original content.	Used for invalid or inaccurate user submissions.

6. Master Data Maintenance (Record Management)

When new plant equipment or protective policies are introduced, administrators can create new safety sign entries directly.

➕ Adding New Sign Entries

Click "Add Sign" in the administration bar and fill out the dialog form:

- **Sign Code:** Enter a unique identifier (e.g., W008, P015).
- **Category:** Select or enter category (e.g., Warning, Prohibition).
- **Sign Title:** Input standard safety title (e.g., Caution High Temp).
- **Image URL:** Provide a valid image link URL.

Click confirm to auto-write records into the database and refresh page views.

🗑️ Deleting & Deprecating Signs

If a sign becomes obsolete, administrators can click "Delete" beside the item in admin mode. The item will be permanently removed after a second confirmation.

7. Troubleshooting & FAQ

Issue	Possible Cause	Recommended Action
Cannot start Practice Quiz	Fewer than 4 signs in database.	Contact administrator to add required sign data.
Assessment score missing	Network interruption or invalid ID.	Verify Employee ID and resubmit, or contact HSE.
Admin password rejected	Caps Lock on or incorrect password.	Click "Reset Password" or contact System Admin.
